BEW India

Product Specification Sheet - 25 Nov 2026

Folding Cultivator

Folding Cultivator

BEW India Folding Cultivator is a farming implement or machine designed to stir the soil around a crop as it matures to promote growth and control weeds. The main function of the Folding Cultivator is to prepare a proper seedbed for the crop to be planted into, to bury crop residue in the soil (helping to warm the soil before planting), to control weeds, and to mix and incorporate the soil to ensure the growing crop has enough water and nutrients to grow well during the growing season. In BEW cultivator When one tyne strikes a hidden object, the others continue to work at the correct depth and Spring-loaded assemblies derive their strength from heavy-duty angles, which once fixed to the immensely strong mainframe. We are a pioneer in the manufacturing of excellent quality Cultivator at an affordable price.
