Rotavator/Rotary Tiller

Rotavator Machine - Manufacturers, Exporters & Suppliers
BEW BHIM Mini Rotavator from Bhagwan Engineering Works (BEW). BEW India's Rotavator is the ultimate design of excellent enhancement to use in agricultural fields and remove the stubbles of sugarcane, banana, cotton, grass, vegetables, and other plants easily. The rotary tiller is ideal to clean the soil and make proper aeration for further plantation of crops. This tiller can be perfectly used with a tractor and can be run on both dry and wet fields without any hassle. The tiller design is specifically fabricated to ensure ample porosity of the compact soil. It will be very easy to rejuvenate the soil by increasing aeration, letting moisture pass, and making the field ready for another harvest.
Farmers searching for reliable performance along with an affordable Rotavator Price will find the BEW BHIM Mini Rotavator perfectly designed to meet both efficiency and budget requirements
It contains a heavy chassis to stay stable even in uneven field conditions. The rotating parts of the enhancement are balanced by the computerized feature so that the result is even. The team of BEW India offers relentless support to the farmers to ensure the smooth functioning of the equipment.

BEW India- Rotavator Manufacturers in India

Bhagwan Engineering Works (BEW) is a well-recognized brand for the farmers and agricultural industry in India as well as abroad. It is a Punjab-based company that also exports its products to other countries. BEW India Mini Rotavator or cultivator is used to make the land and soil ready for cultivation. It pierces into the earth as it is dragged vertically. It helps to improve soil fertility and also saves vast amounts of time and labor. It is a tillage machine that makes land ready to be cultivated. It is an economical as well as an extremely useful tool that can be used while farming.

Why Choose our Machine?
Rotavator manufactured by us will help you make the perfect seedbed and help you farm and sow seeds more efficiently. It will help you break up the soil and also help in land leveling. It minimizes fuel consumption and maximizes perfection. The first step to farming is the preparation of the earth. It allows you to do work effectively without using large amounts of labor. As a highly dependable Tractor Rotavator, our BEW BHIM model is engineered to work seamlessly with a wide range of tractor HP categories, ensuring smooth operation across all soil conditions

Our KS rotavator is also self-propelled and is capable of moving in linear lines on its own. The machine speed can also be controlled. It is also very easy to use, and you would not need any prior experience to use our machinery. Will the help of this you can tile large pieces of land in a very short duration of time. know more about BEW Rotavator Click Here.
