KSA 9355 Multi Crop Self Propelled Harvester

KSA 9355 Self Propelled Combine Harvester

KSA 9355 Self Propelled Combine Harvester from BEW India is an all-new Self Propelled Combine Harvester KSA Multi crop 9355 that represents the best performance, productivity, and serviceability available. KSA 9355 is India's most popular and ideal combine harvester now with its new features and quality. This Multicrop Combine Harvester is designed to harvest crops like Wheat, Paddy, Soyabean, Pulses, Mustard, etc.

It reduces the time to meet the harvesting requirement with KSA 9355 Crop Master driven by the strong engine from Ashok Leyland. This is the ideal harvester that is self-propelled. The engineering behind the fabrication of this huge machine includes heavy-duty gear, 1312 big clutch plates, an outer cutter bar, cutter gear for blade movement, and various other elegant features.

KSA 9355 Crop Master is considered one of the most sophisticated agricultural equipment for Indian soil to use and harvest a huge area in no time. This harvester is ideal for harvesting paddy, wheat, sunflower, grams, pulses, soya beans, etc. The team of BEW India has fabricated a state-of-the-art heavy harvester for the easement of harvesting huge fields without wasting resources and manpower. The harvesting time and spoilage will be reduced to a minimum. The durable machine and its outstanding performance are what you need for your convenience in the crop field.

Advanced Engineering and Performance Excellence

The KSA 9355 Self Propelled Combine Harvester is a highly engineered product that has unmatched performance in the Indian farming conditions. This machine has strong parts and solid working mechanisms that make it durable even when it is in the process of harvesting its fruits all time. Its massive Ashok Leyland engine offers constant torque and fuel efficiency which enables the farmers to harvest big lands without inconvenience.

The powerful transmission system, robust gears, and 1312 large clutch plates boost the stability in the operations and the power distribution. The advanced cutter gear system and outer cutter bar provide uniform cut of crops and a large cut of the crop is eliminated. The combination of these sophisticated engineering designs makes the KSA 9355 Crop Master a dependable option to farmers who want to be productive and have long performance.

The comfort of the operator and easy control is also the design consideration of this self-propelled combine. The machine contains easy to work with controls and manoeuvrability which enables the operators to work through long harvest times with ease. The durable construction also makes sure that the breakdowns are minimal thus minimizing the maintenance expenses and time of closing down during the peak harvesting seasons.

Higher Productivity with Multi-Crop Capability

The KSA 9355 Multi Crop Combine Harvester has one of the largest benefits in terms of versatility. It is used to deal with a crop like wheat, paddy, soybean, mustard, pulses, grams, and sunflower, whereby it will do away with the use of several machines to deal with various crops. This multi-crop capability enhances the performance of the farm as well as bettering the returns on investment.

The machine has a great threshing capacity and effective cleaning system that ensures that the damage to the grains is reduced and the quality of output is enhanced. Through less spoilage and harvesting time saved, farmers are able to finish their jobs in less time and ready fields to next production cycle promptly.

The KSA 9355 can be utilized in large and medium-sized farms because it has strong chassis, fuel efficiency, and high harvesting rate. It greatly decreases labor reliance and handwork and enables the farmers to earn maximum profits and save resources at the same time.

At BEW India, we are particularly concerned with the provision of innovative and high-quality agricultural solutions that are durable, perform well, and cost-effective. An example of that is the KSA 9355 Self propelled combine harvester which is a testament of our dedication to innovation and quality production. It can be used to harvest paddy or wheat,

and whichever it is, this machine is designed to fulfill the current agricultural expectation efficiently and reliably.

To know more about self Combines Click Here. We are a pioneer in the manufacturing of excellent quality Self Combines at an affordable price with these specifications :

Overall Length(mm)	8490
Overall Width(mm)	6335
Overall Height(mm)	3730
Weight(kg)	8950
Cutting Width(mm)	4300

For booking click here. or You can contact on BEW India customer support numbers 1800120004455 to buy KSA 9355 Self Combine.
More specifications are down below:

- Single sheet tail cover.
- Folding elevator box for easy maintenance.
- Sheet channel-type lightweight reel.
- Double paddle hydraulic brake for easy turning.
- A specially designed cutter bar can harvest the fallen crops.
- For safety side cover provided.
- Powered by Ashok Leyland.
- Heavy-duty gear with 1312 big clutch plates.
- Cutter gear for better grain separation.
- Safe straw walker for better grain separation.
- Safe & decorated operator cabin.
- Free tool and spare part kit with the harvester.
- All rotating parts balanced by computer balanced machine.
- Registration (R.C. copy) and Bank Loan facility.
- Subsidy & Finance Available*
