Mobile Shredder/Fodder Harvester

Mobile Shredder/Fodder Harvester

Mobile Shredder/Fodder Harvester also known as Chara machine from BEW India.

It's specially designed for perfect cutting and shredding forage quickly and tackles different types of crops and field conditions with longer life. There are mainly two systems, Feeding & Shredding. Easy to transfer from one place to another with the tractor. Shredded fodder can be collected in the attached trolley, which can be equipped with an optional hydraulic chute to help guide the flow. Row crops such as maize/corn, Alfalfa, and Napier Grass are shredded with it.This machine also supports farmers who are looking for reliable chara cutting machine options for daily fodder preparation.

Mobile Shredder has a folding frame for convenient and hassle-free carrying and an inbuilt blade sharpening mechanism. Here are some special features of the Mobile Shredder: It is the fastest, easiest, and most efficient way of removal of sticks. It improves soil fertility and has a long life of cutting blades.Due to its versatile performance, many farmers also recognise it as a Chara Kaatne Wali Machine or Chara Katne Ki Machine, especially useful for larger herds.

With increasing demand, users often compare the Chara Machine Price in different regions. The affordability of the machine, along with its long service life, makes it a good match for farms that need continuous fodder production. In many cases, buyers also check the Chara Cutting Machine Price to find a model that suits seasonal or commercial usage.

The Mobile Shredder also works efficiently as a fodder harvester, making it easier to manage crops like Napier and maize. This multi-purpose functionality has increased its popularity among farmers who seek both a mobile shredder and a dependable chara machine for day-to-day feeding tasks.

In addition, the availability of Chara Kaatne Wali Machine Price and Chara Katne Ki Machine Price variations allows farmers to choose based on their budget. Some upgraded variants are also preferred as an electric chara machine, offering smoother and faster cutting performance.
